

Doubles and Near Doubles

Name: _____

Doubles are worth learning by heart, because they unlock the sums beside them.

$1 + 1 = \square$

$2 + 2 = \square$

$3 + 3 = \square$

$4 + 4 = \square$

$5 + 5 = \square$

$6 + 6 = \square$

$7 + 7 = \square$

$8 + 8 = \square$

$9 + 9 = \square$

$10 + 10 = \square$

Near doubles. Each one is the double above it, and one more.

$1 + 2 = \square$

$2 + 3 = \square$

$3 + 4 = \square$

$4 + 5 = \square$

$5 + 6 = \square$

$6 + 7 = \square$

$7 + 8 = \square$

$8 + 9 = \square$

$9 + 10 = \square$

Doubles and Near Doubles — Answer Key

$1+1=2$ $2+2=4$ $3+3=6$ $4+4=8$ $5+5=10$ $6+6=12$

$7+7=14$ $8+8=16$ $9+9=18$ $10+10=20$

Near doubles: $1+2=3$, $2+3=5$, $3+4=7$, $4+5=9$, $5+6=11$, $6+7=13$, $7+8=15$, $8+9=17$, $9+10=19$, $10+11=21$
