

# Shapes and Sides

Name: \_\_\_\_\_

*Write each shape's name and count its sides.*

| Shape                                                                               | Name | How many sides? |
|-------------------------------------------------------------------------------------|------|-----------------|
|    |      |                 |
|    |      |                 |
|    |      |                 |
|    |      |                 |
|    |      |                 |
|  |      |                 |
|  |      |                 |
|  |      |                 |
|  |      |                 |

*Use these words: circle square triangle rectangle diamond  
pentagon hexagon star oval*

## Shapes and Sides — Answer Key

---

triangle – 3   square – 4   circle – 0 (no straight sides)   rectangle – 4  
diamond – 4   pentagon – 5   hexagon – 6   star – 10   oval – 0
